Importance: High

6 ABC Philadelphia: Federal agency fails to notify Allentown residents about their increased cancer risk Nearly three dozen people are suing an Allentown company, accusing it of emitting a toxic gas that caused their cancer. The lawsuit alleges people living near B.Braun have an increased cancer risk of 200 times more than the average Pennsylvanian. According to its own studies in 2016, the Environmental Protection Agency knew ethylene oxide or ETO was much more dangerous and cancer-causing than previously thought.
